

```
library(ggplot2)
```

This plot has the correct axes:

```
ggplot(mpg, aes(x = displ, y = hwy)) +  
  geom_point()
```

```
library(ggtern)
```

```
## Registered S3 methods overwritten by 'ggtern':
```

```
##   method      from  
##   grid.draw.ggplot ggplot2  
##   plot.ggplot    ggplot2  
##   print.ggplot   ggplot2
```

```
## --
```

```
## Remember to cite, run citation(package = 'ggtern') for further info.
```

```
## --
```

```
##
```

```
## Attaching package: 'ggtern'
```

```
## The following objects are masked from 'package:ggplot2':
```

```
##  
## aes, annotate, ggplot, ggplot_build, ggplot_gtable, ggplotGrob,  
## ggsave, layer_data, theme_bw, theme_classic, theme_dark,  
## theme_gray, theme_light, theme_linedraw, theme_minimal, theme_void
```

This plot does not have axes:

```
ggplot(mpg, aes(x = displ, y = hwy)) +  
  geom_point()
```
